## Who We Are

Legacy Construction Group, Inc. has provided Commercial and Residential Construction services to Central Missouri since 2006. We pride ourselves on our construction management experience, organization, and attention to detail. Each step of the way, Legacy team members are involved to help move each project along. We make cost, schedule, and construction information available as the project moves forward so that our clients can make more cost-effective decisions. Our team approach allows work to proceed rapidly and economically, eliminating wasteful effort and lost time.
